# Himanshu Trivedi

**Software Engineer — AI & Machine Learning Engineer**

trivedihimanshu.019@gmail.com — +91-9026410701 — Kanpur, India
LinkedIn — GitHub — Portfolio

## Professional Summary

AI-focused Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with hands-on experience in building intelligent applications, automation systems, and full-stack AI solutions. Skilled in Python, Java, C++, React.js, Node.js, Flask, and cloud technologies including AWS and IBM Cloud. Experienced in developing projects involving NLP, Computer Vision, Time-Series Forecasting, and AI-powered platforms. Strong problem-solving abilities with practical exposure to scalable application development, API integration, and database management. Passionate about creating production-ready AI systems that solve real-world challenges through innovation and modern technologies.

## Education

**B.Tech in Computer Science (AI Specialization)** 2023 – 2027
Vellore Institute of Technology, Bhopal

**Class XII – OSVN Inter College, Kanpur** 2022
80%

**Class X – OSVN Inter College, Kanpur** 2020
86.40%

## Technical Skills

- **AI/ML:** ML, Deep Learning, NLP, Computer Vision, Forecasting
- **Languages:** Python, Java, C++, JavaScript
- **Frameworks:** Flask, Node.js, Express.js, React.js, Next.js
- **Databases:** MySQL, MongoDB, Supabase
- **Cloud/Tools:** AWS, IBM Cloud, Docker, Git, GitHub

## Experience

**Artificial Intelligence Intern – SmartBridge (Google Partnership)** May 2025 – Jul 2025

- Built ML models using supervised and unsupervised learning.
- Implemented NLP pipelines for text classification and sentiment analysis.
- Deployed AI models on cloud platforms.

**Cloud Fundamentals Intern – IBM** Jun 2025 – Jul 2025

- Worked with IBM Cloud deployment and cloud-native applications.

## Projects

**LYRA – Personal AI Assistant**

- Built local-first AI assistant with automation and voice interaction.
- Integrated LLM reasoning and API automation.

**Fundora – AI-Driven Crowdfunding Platform**

- Developed full-stack platform using Next.js and Supabase.
- Implemented donor churn prediction and revenue forecasting.

**Unemployment Insurance Forecasting**

- Applied time-series forecasting models to predict beneficiary trends.
- Performed feature engineering and model evaluation for improved accuracy.

**Anime & TV Series Tracker**

- Built full-stack tracker using React, Node.js, and MongoDB.

## Certifications

- Introduction to Machine Learning – IIT Madras (NPTEL)
- Artificial Intelligence – Google (SmartBridge)
- Introduction to Cloud – IBM

## Achievements

- Top 20 Finalist Teams Nationwide – NASSCOM National Hackathon.
- Built LYRA for OpenAI Open Model Hackathon 2025.
- Developed AI-driven applications and scalable ML solutions.
